QuietNite Laser Therapy

QuietNite *Before and After*

Treatment for Soft Palate Region

With the DEKA CO_2 laser, treating the soft palate, tonsils, and tongue are quick and painless for the patient. During treatment, the laser energy will stimulate collagen and help tighten the areas treated. This quick, painless procedure decontaminates the area while sealing nerve endings leading to no pain, no side effects, and no bleeding. Patients can immediately drink, eat and resume normal activities. An average of one or two procedures spaced 30 days apart annually is all that is needed to see results for most patients.

Why do we snore?

Snoring is a very common and often overlooked issue in many adults today. The most common reason for snoring is when the elasticity of the soft palate is relaxed from age, or the overall volume of the throat is reduced due to weight gain.

When it comes to relieving patients of that symptom, DEKA QuietNite is best for the job. Laser therapy is also a great tool used in conjunction with other sleep aids and appliances prescribed by your doctor to give you a better night's rest.

> *"The DEKA CO_2 Laser provides our patients with a pleasant, safe and effective treatment experience."*

Cost of DEKA QuietNite

The cost of DEKA QuietNite treatment rangess per application depending on complexity. Many offices offer in-house financing for those who request it.

Insurance will likely not cover DEKA QuietNite procedures. Both dental and medical insurance view DEKA QuietNite as an "elective" procedure. However, you can use the pre-tax dollars in your flexible spending account (FSA) or health savings account (HSA) toward DEKA QuietNite treatment.

DEKA ***QuietNite***

How long do DEKA QuietNite results last?

Ease of use for the treatment means that DEKA QuietNite can be used quickly and frequently. For patients commonly experiencing snoring symptoms, treatment from DEKA QuietNite can be used annually, even during regular cleanings and hygiene visits.

Benefits for Patients

Patients who have Laser Therapy experience:

- No downtime and no bleeding
- Results in as little as five days
- Quality of life improves
